## CALCULADORA DE “FOOD MILES”

“Food miles” ou quilómetros alimentares são uma forma de tentar medir a distância percorrida pelos alimentos antes de chegarem ao consumidor. É uma boa maneira de olhar para o impacto ambiental dos alimentos e seus ingredientes. Inclui levar os alimentos até ao prato, mas também levar os resíduos alimentares para longe dele, até ao aterro sanitário!

The screenshot shows the homepage of the Food Miles Calculator website. The header features the logo 'foodmiles.com' with a dashed line and arrows indicating a path. Navigation tabs include 'Home', 'Food Miles?', 'Egg Miles', 'Fuel Project', and 'Veggie Trumps'. A navigation bar on the right asks 'How well travelled is your food?' with a sun icon and a red apple character. The main content area is titled 'Food Miles Calculator' and includes a welcome message, a definition of food miles, and a section titled 'What Does That Mean?' with a green apple character. Below this is a section 'What Are The Effects?' with a text box. A Google ad is visible at the bottom of the main content area. On the right side, there is a green sidebar titled 'Food Miles Calculator' with three steps: 'Step 1: Where are you?' with a location dropdown set to 'United Kingdom'; 'Step 2: Where has your food come from...?' with a country dropdown set to 'Select Country'; and 'Step 3: What are you tracking?' with a text input field for 'Food Item' and a 'Submit' button. A pink character is at the bottom of the sidebar.
